

NSU has been ranked the #1 university in Bangladesh by the prestigious Times Higher Education (THE) World University Rankings 2025 with a Global Rank of 801 - 1000. I feel very proud of this achievement, and also very privileged to serve as Dean of the School of Engineering and Physical Sciences (SEPS) during this time of continued growth and opportunity for the school as well as for our faculty members and students.

NSU SEPS stands out as an exceptionally good place in the country for engineering and architecture education by promoting experiential learning, innovative Senior Design projects, alumni network and collaborative faculty research. We strive to produce the best quality engineers and future leaders to solve 4IR (Fourth Industrial Revolution) problems through cutting-edge research, innovation and startups. We actively encourage our faculty members and students to solve practical problems, in the context of engineering technology and applications, through industry academia collaborations and make significant contributions to the socio-economic development of the society.

I look forward to collaborating with international universities, industry partners and researchers as we continue to serve and strengthen this School with great accomplishments. We hope you will join us.

Prof. Dr. Shazzad Hosain

Dean and Professor, School of Engineering and Physical Sciences (SEPS)
